# BUSINESS DIRECTORY OF TOWNS, Alphabetically Arranged.

---

## PRELIMINARY INFORMATION.

1. The names of all the Towns and all the Post Offices in the State, except those which have North, East, South, West or Center prefixed to the names of the towns of which they are a part, are here alphabetically arranged.

2. For villages above excepted, look under the name of the town. But East Kingston, North Hampton, South Hampton, South Newmarket, and Westmoreland are *towns*.

3. After the name of each town, you find the name of the *county* in which it is located, the population in 1880, the direction and approximate distance from Concord and from the Shire town of the county, the way of reaching it by rail, the town officers and the professional and business men, arranged under different heads, as nearly alphabetically as is convenient, some regard being had to economy of space.

4. Merchants are supposed to keep a general assortment, and physicians to be "old school" unless otherwise specified.

5. All these items are referred every year, usually between Aug. 1, and Dec. 1, to the Town Clerks, Postmasters or other prominent men of the several towns and villages for correction.

6. We earnestly solicit corrections from all other persons who may notice things which they *know* to be errors.

7. Of course changes are made, in March, of Town Officers, and other changes are constantly occurring, so that one need not expect to find this Directory absolutely correct all the year round, but *use* it with this understanding and you will find it very valuable.

# BUSINESS DIRECTORY OF TOWNS, Alphabetically Arranged.

---

## PRELIMINARY INFORMATION.

1. The names of all the Towns and all the Post Offices in the State, except those which have North, East, South, West or Center prefixed to the names of the towns of which they are a part, are here alphabetically arranged.

2. For villages above excepted, look under the name of the town. But East Kingston, North Hampton, South Hampton, South Newmarket, and Westmoreland are *towns*.

3. After the name of each town, you find the name of the *county* in which it is located, the population in 1880, the direction and approximate distance from Concord and from the Shire town of the county, the way of reaching it by rail, the town officers and the professional and business men, arranged under different heads, as nearly alphabetically as is convenient, some regard being had to economy of space.

4. Merchants are supposed to keep a general assortment, and physicians to be "old school" unless otherwise specified.

5. All these items are referred every year, usually between Aug. 1, and Dec. 1, to the Town Clerks, Postmasters or other prominent men of the several towns and villages for correction.

6. We earnestly solicit corrections from all other persons who may notice things which they *know* to be errors.

7. Of course changes are made, in March, of Town Officers, and other changes are constantly occurring, so that one need not expect to find this Directory absolutely correct all the year round, but *use* it with this understanding and you will find it very valuable.

The Only machine that received an award on both Horse-power and Thresher and Cleaner, at the Centennial Exhibition; was awarded the two last Gold Medals given by the New York State Agricultural Society on Horse-powers and Threshers; and is the Only Thresher selected from the vast number built in the United States, for illustration and description in 'Appleton's Cyclopaedia of Applied Mechanics,' Recently published, thus adopting it as the standard machine of this country. Buy the best. It is cheapest in the end. Catalogue sent free. Address, MINARD HARDEB, Cobleskill, Schoharie Co., N.Y.

sawed between six and seven thousand cords of wood with the Two-horse Fearless Power I purchased of you, in August, 1880, earning over \$3000.00. In 14 weeks, in the months of Feb., March, April and May, 1883, I sawed over 1500 cords, amounting to over \$700.00. Sawed for George Powers of the town of Victor, 41 cords of four foot wood, twice in two, in eight hours and a half, earning \$16.40. Have earned \$36.00 in a week. Would rather have the net earnings of a Two-horse Fearless Power and Circular saw-machine than the net income of an ordinary farm."

J. B. Palmer, Jewett City, Conn., writes, Nov. 12, 1884, about the Fearless Two-horse machine: "Have threshed over 22,000 bushels with the machine I purchased of you last year, and have paid out only \$1.25 for repairs. It runs like a top. Can thresh 100 bushels a day more than a Gray machine can. Have been crowded, threshing all the time since Aug. 7th.

The Only machine that received an award on both Horse-power and Thresher and Cleaner, at the Centennial Exhibition; was awarded the two last Gold Medals given by the New York State Agricultural Society on Horse-powers and Threshers; and is the Only Thresher selected from the vast number built in the United States, for illustration and description in 'Appleton's Cyclopaedia of Applied Mechanics,' Recently published, thus adopting it as the standard machine of this country. sawed between six and seven thousand cords of wood with the Two-horse Fearless Power I purchased of you, in August, 1880, earning over \$3000.00. In 14 weeks, in the months of Feb., March, April and May, 1883, I sawed over 1500 cords, amounting to over \$700.00. Sawed for George Powers of the town of Victor, 41 cords of four foot wood, twice in two, in eight hours and a half, earning \$16.40. Have earned \$36.00 in a week. Would rather have the net earnings of a Two-horse Fearless Power and Circular saw-machine than the net income of an ordinary farm."

J. B. Palmer, Jewett City, Conn., writes, Nov. 12, 1884, about the Fearless Two-horse machine: "Have threshed over 22,000 bushels with the machine I purchased of you last year, and have paid out only \$1.25 for repairs. It runs like a top. Can thresh 100 bushels a day more than a Gray machine can. Have been crowded, threshing all the time since Aug. 7th.

# The 76 Swivel Plow.

THREE SIZES.

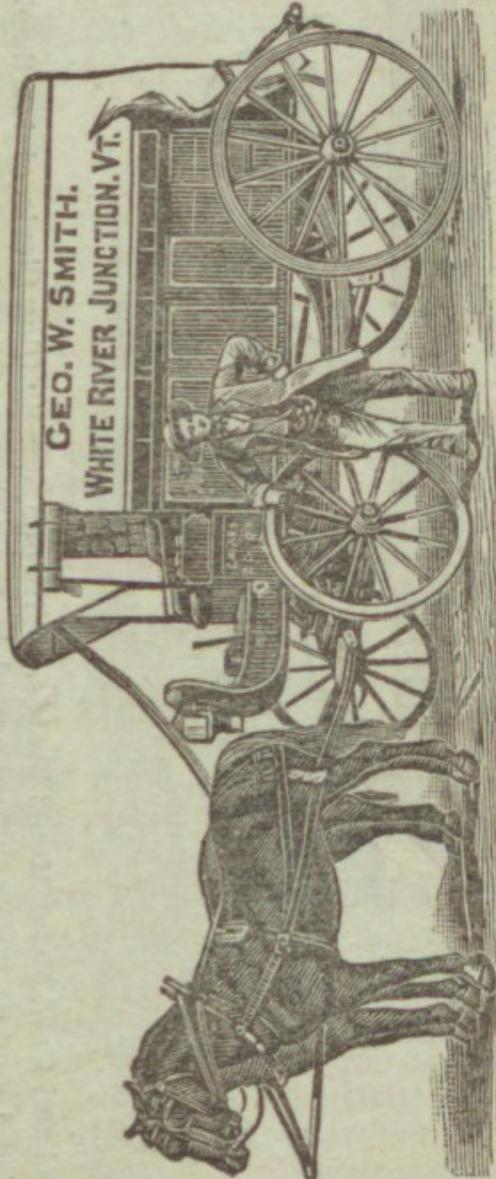

In Steel and Hard Metal Mould-boards. With our New Shifting Clevis, giving the plow more or less land on either side, operated by the plowman, this plow does perfect work both ways.

The New Steel Lever Shifting Clevis, as seen in cut, is perfect, and much superior to any other shifting clevis. It is strong, durable, simple, and cannot get out of order. The lever rests in iron notches, between handles, operated by plowman either way, much or little, to take a wide or narrow furrow, or to plow near fences, etc. This alteration can be made when the team is in motion, if necessary, so easy that any boy can handle it,
